

**Course:** Summer Working with Lime

**Duration:** ½ Day

**Course Description:**

Our definitive guide to summer working with lime mortars with hints, tips and practical advice to help you cope with what the weather throws at you.

Join us for the ultimate guide to summer working with lime! Ours hints, tips and practical advice will enable you to work successfully with lime mortars in high temperatures and with rapid drying effects of both the sun and wind. In fact it's harder to cool down a building than heat it up!

**Course suitability**

This course is suitable for anyone in the 'wet trades', owners of traditional buildings and specifiers of lime mortars wanting to ensure the success of using and curing lime mortars successfully in the summer months.

**Learning outcomes**

Learn about the optimum curing conditions for lime mortars and to closely replicate them on site.

Creating a sensible regime for working in higher temperatures

Best site practices

How temperature influences the performance of mortars

Using additives in mortars

How to achieve the successful curing of mortars

Options for protecting and covering work from the elements

**Course programme**

The workshop will consist of a mixture of lecture and practical demonstrations.
